Office Action Summary

Art Unit: 2834

Claims 1-9 are rejected under 35 U.S.C 102 as anticipated by Kadota. As noted by applicant Kadota teaches a two layer electrode of gold over chromium. It is noted that applicant claims only a material "capable of ..." no specific materials are claimed. There is no evidence that chromium isn't a "capable" of being etched by a chlorine based gas. Thus a prima facie case that chromium fulfills the boundaries of the claim is seen to be made. The paper supplied by applicant may establish that chlorine gas is the preferred etchant for chromium - it does not establish that chromium isn't "capable" of being etched with a chlorine based gas.

It is noted that the report by the Japanese Patent Office cites the patents on the 1449 (paper no.3: 9/24/01) also anticipate the claimed device.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
